

Environmental and Equipment Design Award 2025

環境・設備デザイン賞 2025

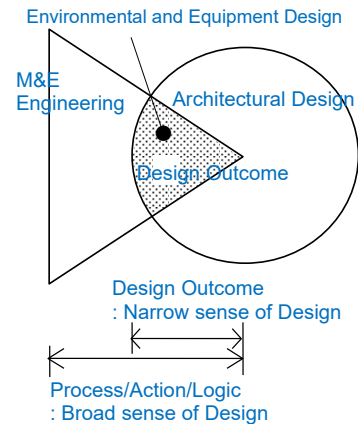

24th Environmental and Equipment Design Award Criteria and Application Procedure

1. Introduction

The role of Environmental and Mechanical and Electrical (M&E) Engineering in building design has been increasingly important and it has also been clear that the design of M&E system can largely affect architectural design.

Environmental and Equipment Design are considered to be evaluated comprehensively and objectively base on the following four aspects;
 “sensibility” which has not been regarded in M&E design before
 “functionality”
 “economics”
 “sociality” which includes environmental issues

In order to assist recognition of suitable and objective evaluation for environmental and M&E design by public, 24th Environmental & Equipment Design Award shall be given for the excellence in environmental and M&E design.

2. Categories

The 24th Environmental & Equipment Design Award embraces three award categories.

I. M&E Equipment/System Design

M&E Fixture/M&E Equipment/M&E System with excellence in aesthetical and functional design

II. Integrated M&E Design

M&E Equipment / M&E System which is integrated into a single architectural design harmonically and functionally

III. Landscape Design

Design which takes a progressive approach for harmonization with natural environmental
 e.g. integration of architecture and landscaping, proposal of urban district and plaza
